Dear Ms. Sabey:

On November 14, 2001, we received a Notice to conduct exploration operations on public lands located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, of Section 17, Township 11 South, Range 17 West. At the present time, we are reviewing your notice for any conflicts with cultural resources, and threatened and/or endangered plant and animal species. We have contacted the Utah State Office (USO) of the Bureau of Land Management (BLM), Mining Law Adjudication Department, and they will be sending you information on posting a bond to cover the reclamation of your exploration activities. You are not to begin exploration activities until we have conformation from the USO, BLM and the Division of Oil, Gas and Mining (DOGM) concerning the bond and required permits. If there is a concern with your notice, you will be contacted as soon as possible.

We have forwarded a copy of your notice of exploration on to DOGM for their review. Please be advised that you must receive written acceptance from DOGM before commencing active operations on your project area. DOGM requires the payment of permit application fees before acknowledging acceptance of a complete notice of intention. A \$100 fee is required to accompany new notices for exploration or small mining operations (disturbing 5 or less surface acres); \$350 is required for large mining notices (plan of operation level projects over 5 disturbed acres but less than 50); or \$750 for large mining operation over 350 acres of surface disturbance. You may contact them at (801) 538-5291 for more information in this regard.

If you have any questions, please feel free to contact me at (435)743-3126.

Sincerely,

Larry Garahana
Geologist
